RE: Juvenile Detention Center Visitation – COVID-19

Effective June 1, 2020 Mohave County Juvenile Detention will be allowing visitation to occur with the following precautions in place:

- Entrance into the facility where contact with any juvenile will be made will require a face covering.
- Parents and guardians will be required to wash their hands, complete a questionnaire screening, and temperatures will be recorded. During the visit the visitor and the juvenile will be required to utilize a face covering.
- Parent/guardian visitation will be limited to one parent or guardian per juvenile.
- Visitation will be limited to ½ hour instead of the normal hour with 3 families per session. This will allow for two visitation times to be utilized and allow for social distancing to occur in each session. Sanitation will occur before, between, and after each visitation timeframe.
- It is preferred that Court hearings for detained youth be conducted by telephone/video when possible. Attorneys are authorized to enter the facility to appear in court and/or with their client, but a face covering will be required.
- It is requested that Law Enforcement refrain from attempting to admit a juvenile to detention that is presently exhibiting signs of illness or fever if an obvious and present risk to public safety does not exist.

Thank you for your cooperation and partnership. Please let us know if you have any questions or concerns.
